### OUTDATED MOD

This mod is not known to work with the latest version of Kerbal Space Program. Proceed with caution.

#### Information

#### Changelog

#### Stats

This is a continuation of Zeenobit's original mod.

### What it does:

Adds fully configurable and dynamic captions and overlay graphics to screenshots to better describe the context of screenshots and record your Kerbal adventures.

### Features:

- Adds a fully configurable overlay to your screenshots automatically when taking screenshots
- Supports pre-defined value placeholders to record various statistics about your flight situation onto the screenshot
- Supports formatted date/time display.
- Auto-detects if Earth calendar is configured
- Configurable day/month names for Kerbin calendar (12 months alternating between 35 and 36 days each. 71 weeks per year with 6 days per week).
- Supports multiple layouts and the ability to switch between layouts while the game is running
- Can be suppressed to not add overlay effects when desired (via menu or right clicking on Blizzy Toolbar button)
- Can optionally automatically hide game UI while taking screenshot
- Layouts can be modified while the game is running, allowing for instant preview of changes.
- Supports (but does not require) Blizzy's Toolbar, KSC Switcher, Kerbal Konstructs, RSS and Automated Screenshots and Saves
- Layout inheritance - new in v.1.2.5
- Localisation support - new in v.1.3.0
